

CATALANS!

one last effort...

we already have an arrogant and ruthless police

we already have a media expert in the art of propaganda

we already have a party system which guarantees that the corrupted protect each other

we already have more planned theme parks than anyone else

we already started the privatization of the public service and rescued the banks with our savings

we already have a leader, and his spirit is with all of us

we already have hope!

Now we already have the right to be a Nation-State, to have a State of our own. We deserve to be in the States-club and take part in their heroic and bleeding history.

[... when I sleep, and that's when I see more clearly, I realize that, here and there, we are all afraid of being together in a different way. A country with no borders? Today our dreams don't reach a world that is already common.]
