

SICK OF NORMALITY	DAY	MONTH	YEAR
	02	05	13
We know they lie.			✓
They lie to us. We know that they lie to us.			
We are the flock's black sheep, monitored by politicians and businessmen who lie to us.			✓
We are annoying guinea pigs for the doctors who lie to us.			
We are the broken machines that don't consume for the industry that lies to us.			X
We are the pain in the neck for the pharmacists who lie to us.			
Those who want to sell us health lie to us.			
Those who talk about progress with a hand on their wallet lie to us.			
But we don't believe their toxic lies.			X
Although they would like to make us invisible, lock us up in a disease and throw away the key, poison us and cover our mouths, kill us and plant fake flowers on our graves, they won't be able to lock us up, shut us up or make us disappear. We are going to leave their legal health limbo.			
We are not patient nor are we good patients. We do not justify or explain ourselves.			✓
If you are suffering from Fibromyalgia, if you are surviving with Chronic Fatigue Syndrome, if you are dying of Multiple Chemical Sensitivity, you should know that you are at war. Don't worry, if they do not find a name for your suffering. There are no illnesses, just sick people. Classifications are the ammunitions in a war that has only just begun.			
We are not abnormal, we are sick of normality. Of their normality.			X
We are anomalies, who do not fit in, who do not want to fit into this society. That's why we, as anomalies, tell the truth about society.			
Our moment is now – we say, we decide and we define.			
We don't know fear.			X
